| **WBS Number: 614** | **Title: Bakeout Water** |
|---|---|
| **Originator: L. Dudek** | |

**Description:**

The WBS element consists of the effort to provide a cooling water loop to reject waste heat from the PFC/VV Heating and Cooling System (WBS 64). The cooling loop will be connected to the CS cooling water system.

Description of Existing Equipment/Facilities to be Reused:

System will reject heat to the existing C-site CS water system.

Description of Major Modifications Required to Existing Equipment/Facilities:

NONE
