

# **Free Boundary Healing with the PIES Code**

**Stuart Hudson, Don Monticello  
and Allan Reiman**

# Outline

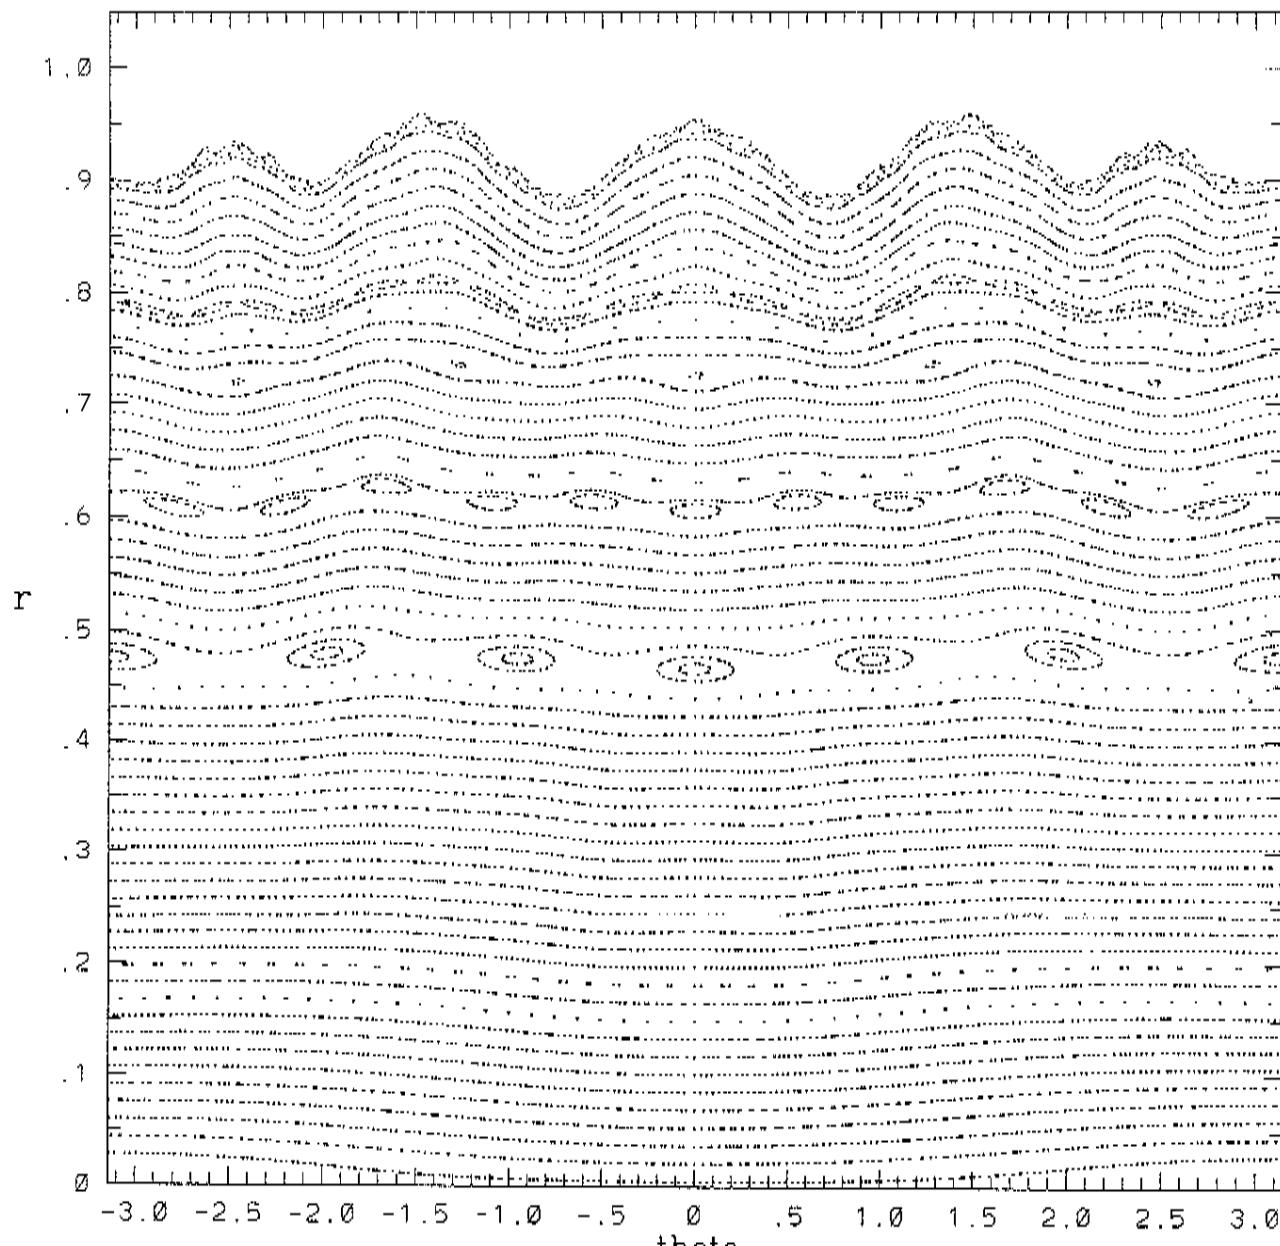

- Best case for li383 09/07 coil set
  - The 09/07 coil set has been optimized for island suppression by modifying the parameters that describe the coil position on the winding surface.
  - Plot (A) is the PIES Poincare plot for the healed coils after 400 iterations. It shows a significant reduction of the islands as compared with plot (B) which is the PIES Poincare plot after 400 iteration for the unhealed islands.
  - Plot (C) is a plot of the coils, original and healed overlayed. It is seen that the coils moved very little to achieve the healing of the islands.
  - Plot (D) is a plot of the radial field ( actually,  $b.\text{grad}(\rho)/b.\text{grad}(\phi)$  ) produced by the original and healed coils. The difference accounts for an island of about 25% of the plasma radius.

- li383 10/17 coil set

- The 10/17 coil set has been optimized for island suppression and non-rippling of the plasma surface by modifying the parameters that describe the coil position on the winding surface.
  - Plot (E) is the PIES Poincare plot after 10 PIES iterations using the healed 10/17 coils and plot (F) is the original coils after 10 PIES iterations.
  - Plot (G) is the PIES Poincare plot after 200 PIES iterations using the healed coils.
  - Plot (H) is the PIES Poincare plot after 180 PIES iterations using the original coils.

A

- PIES Poincare plot for the healed 09/07 coils after 400 iterations.

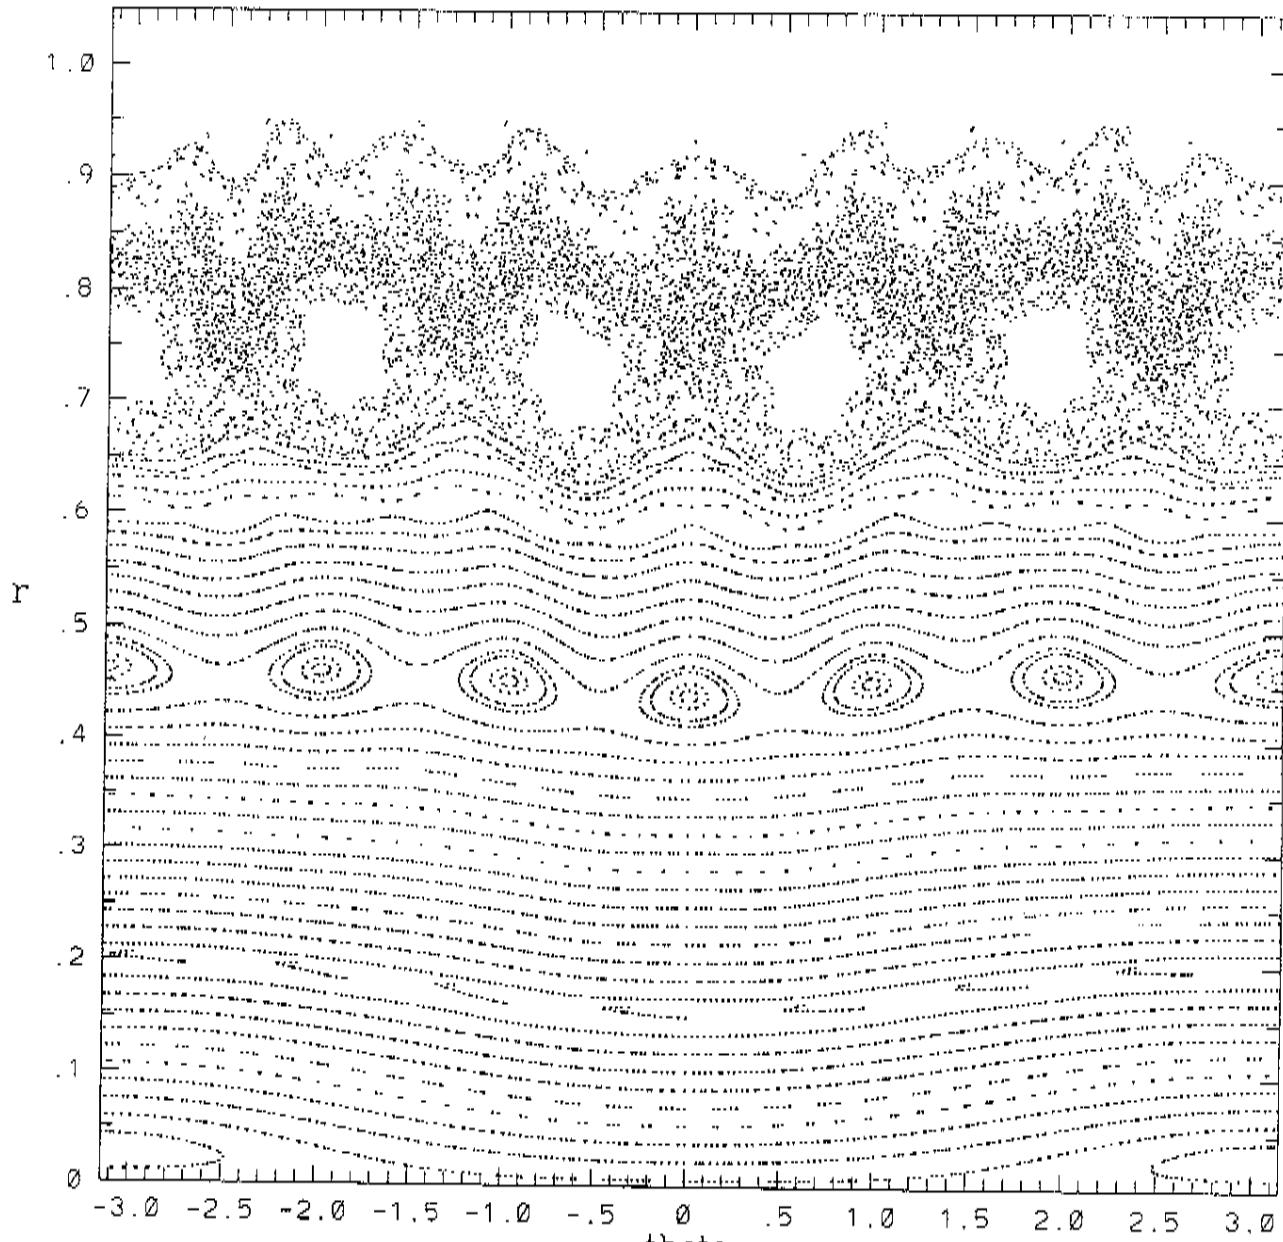

it=401 rpoinc: background coordinates  
li383a25 original coils

Plot 1

B

- PIES Poincare plot for the original 09/07 coils after 400 iteration.

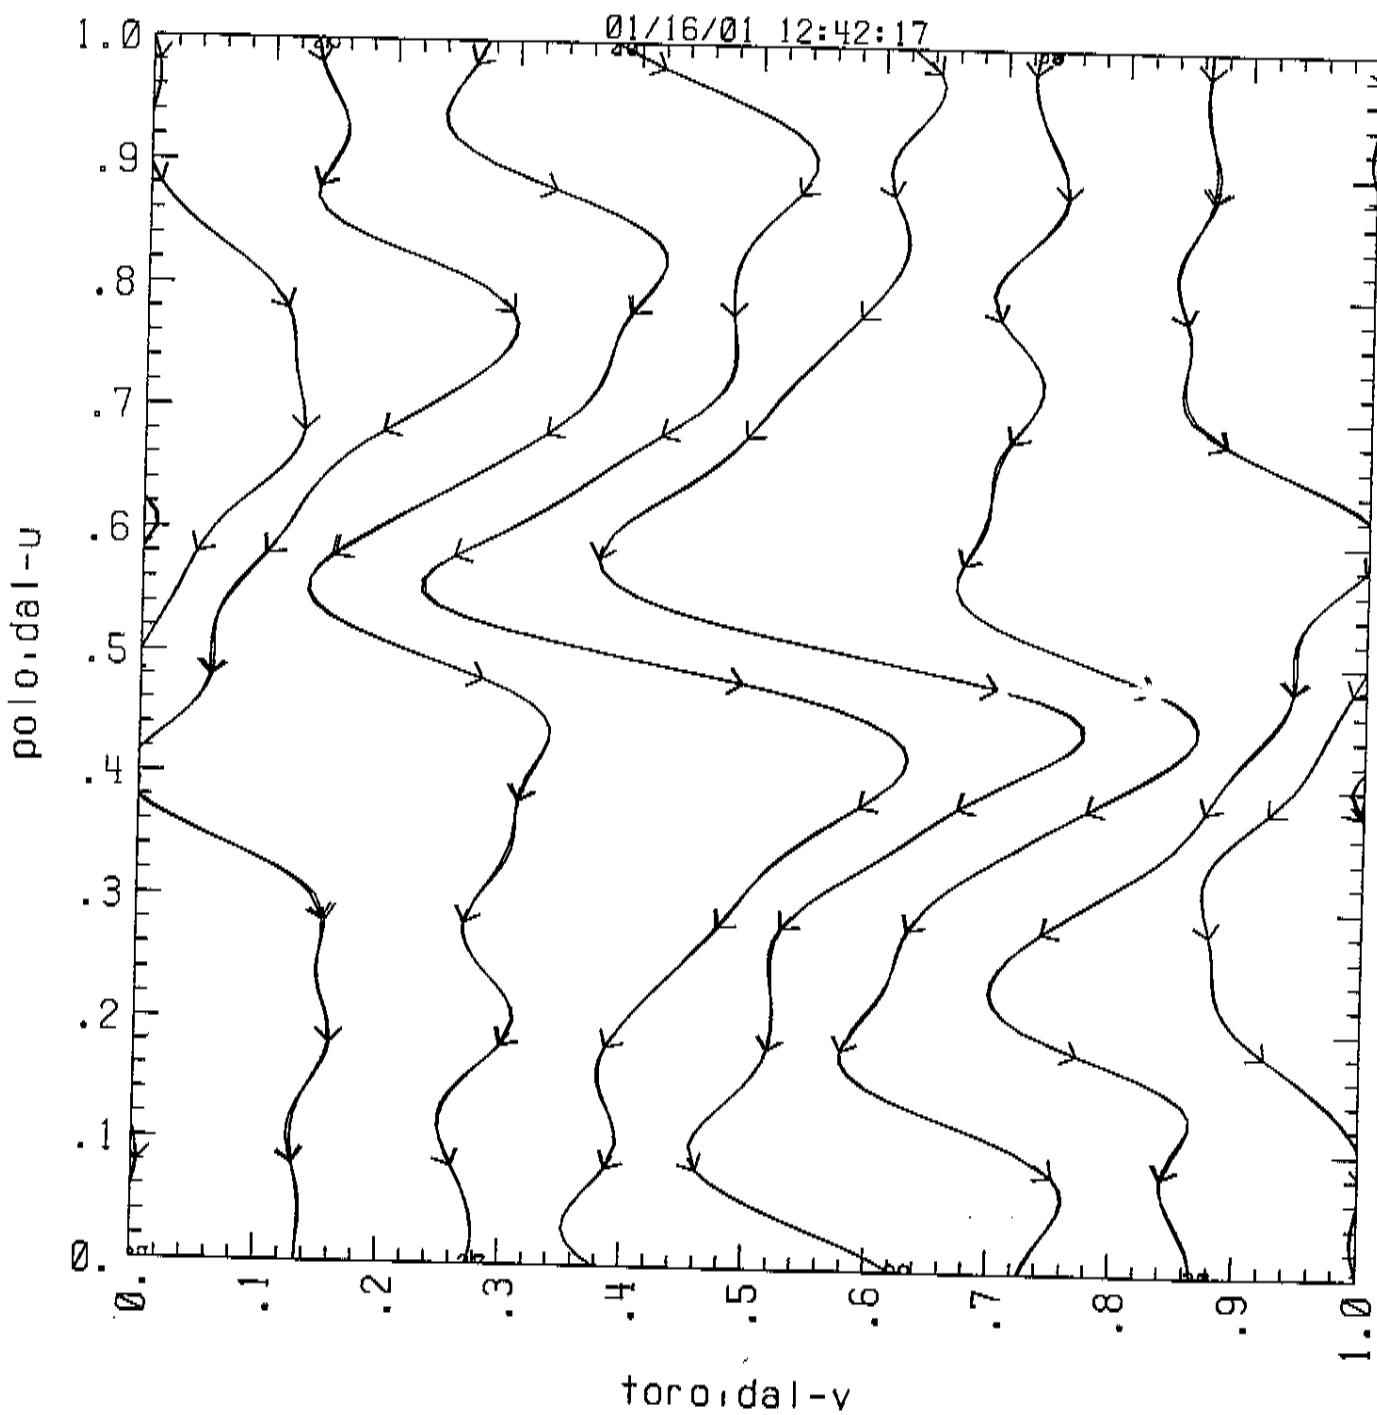

it=402 rpoinc: background coordinates  
li383a25 original coils

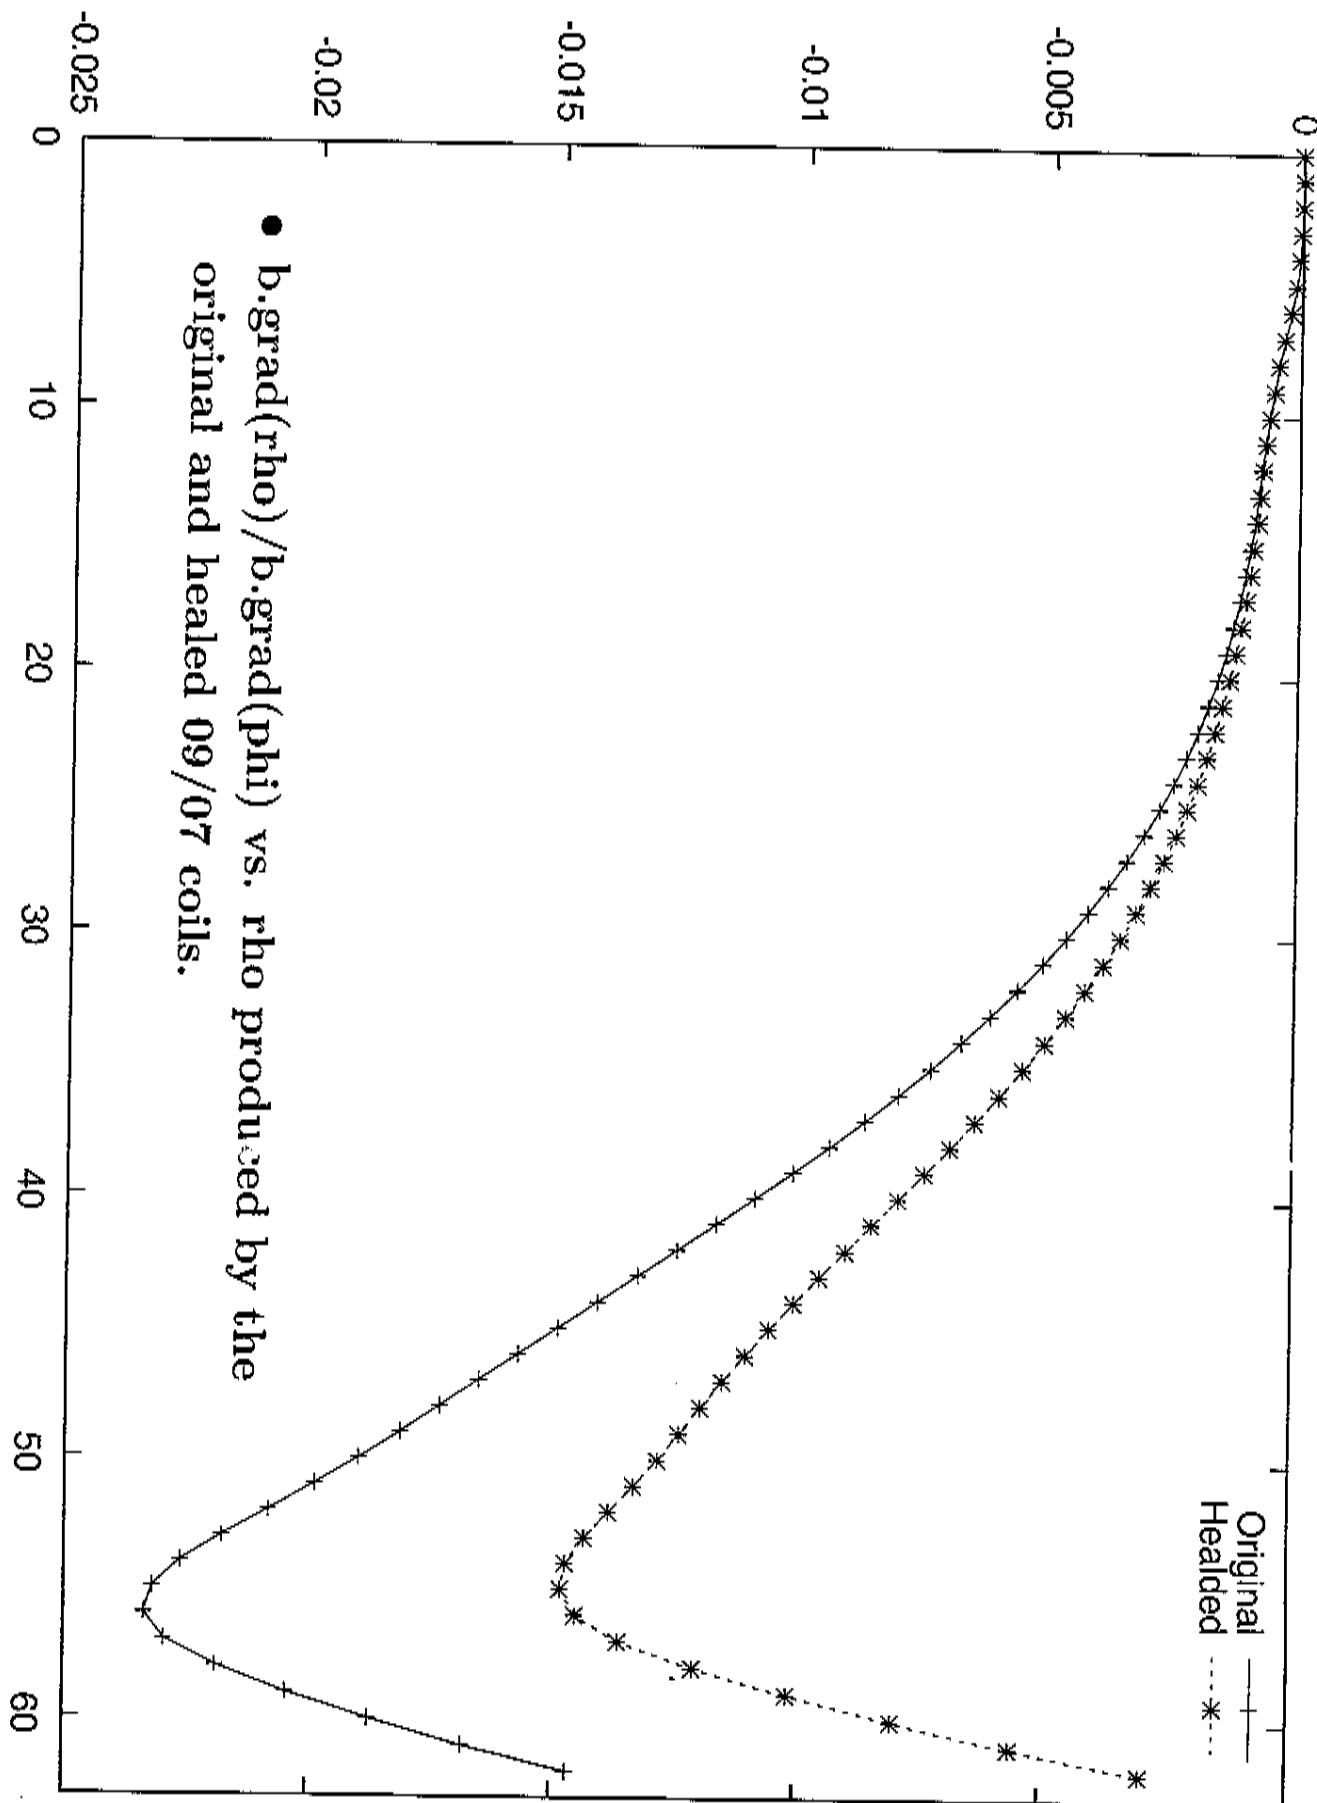

Plot 6

C

- Plot of the coils, 09/07, original and healed overlayed. islands.

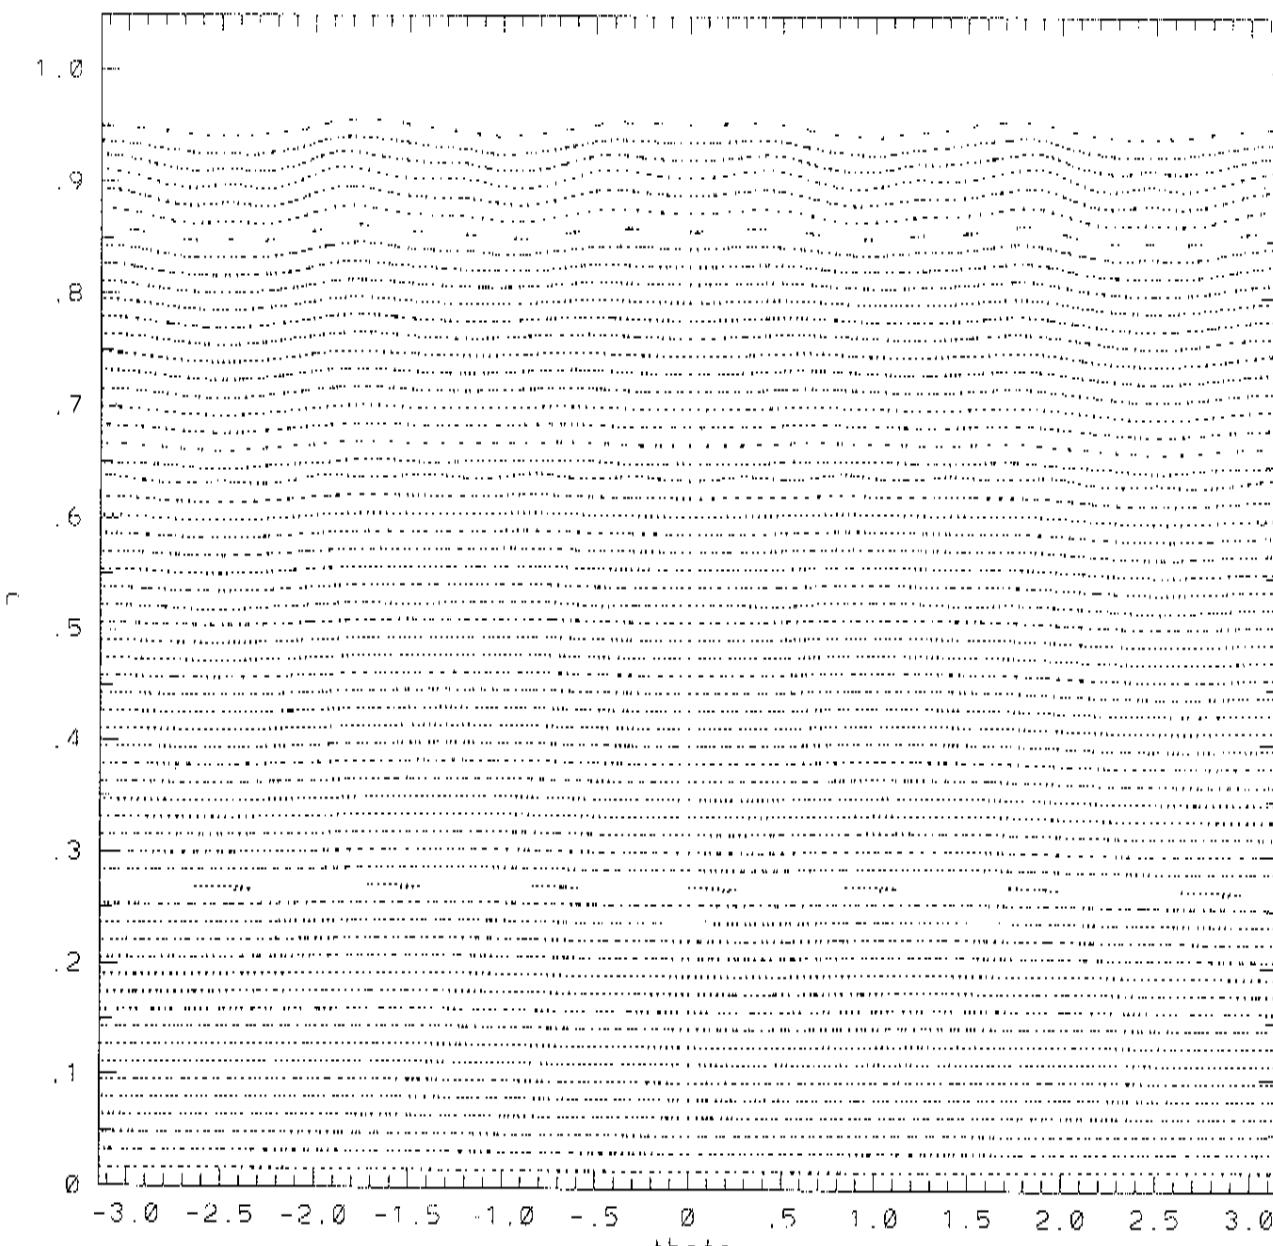

11383 0907a1

- PIES Poincare plot after 10 PIES iterations using the healed 10/17 coils.

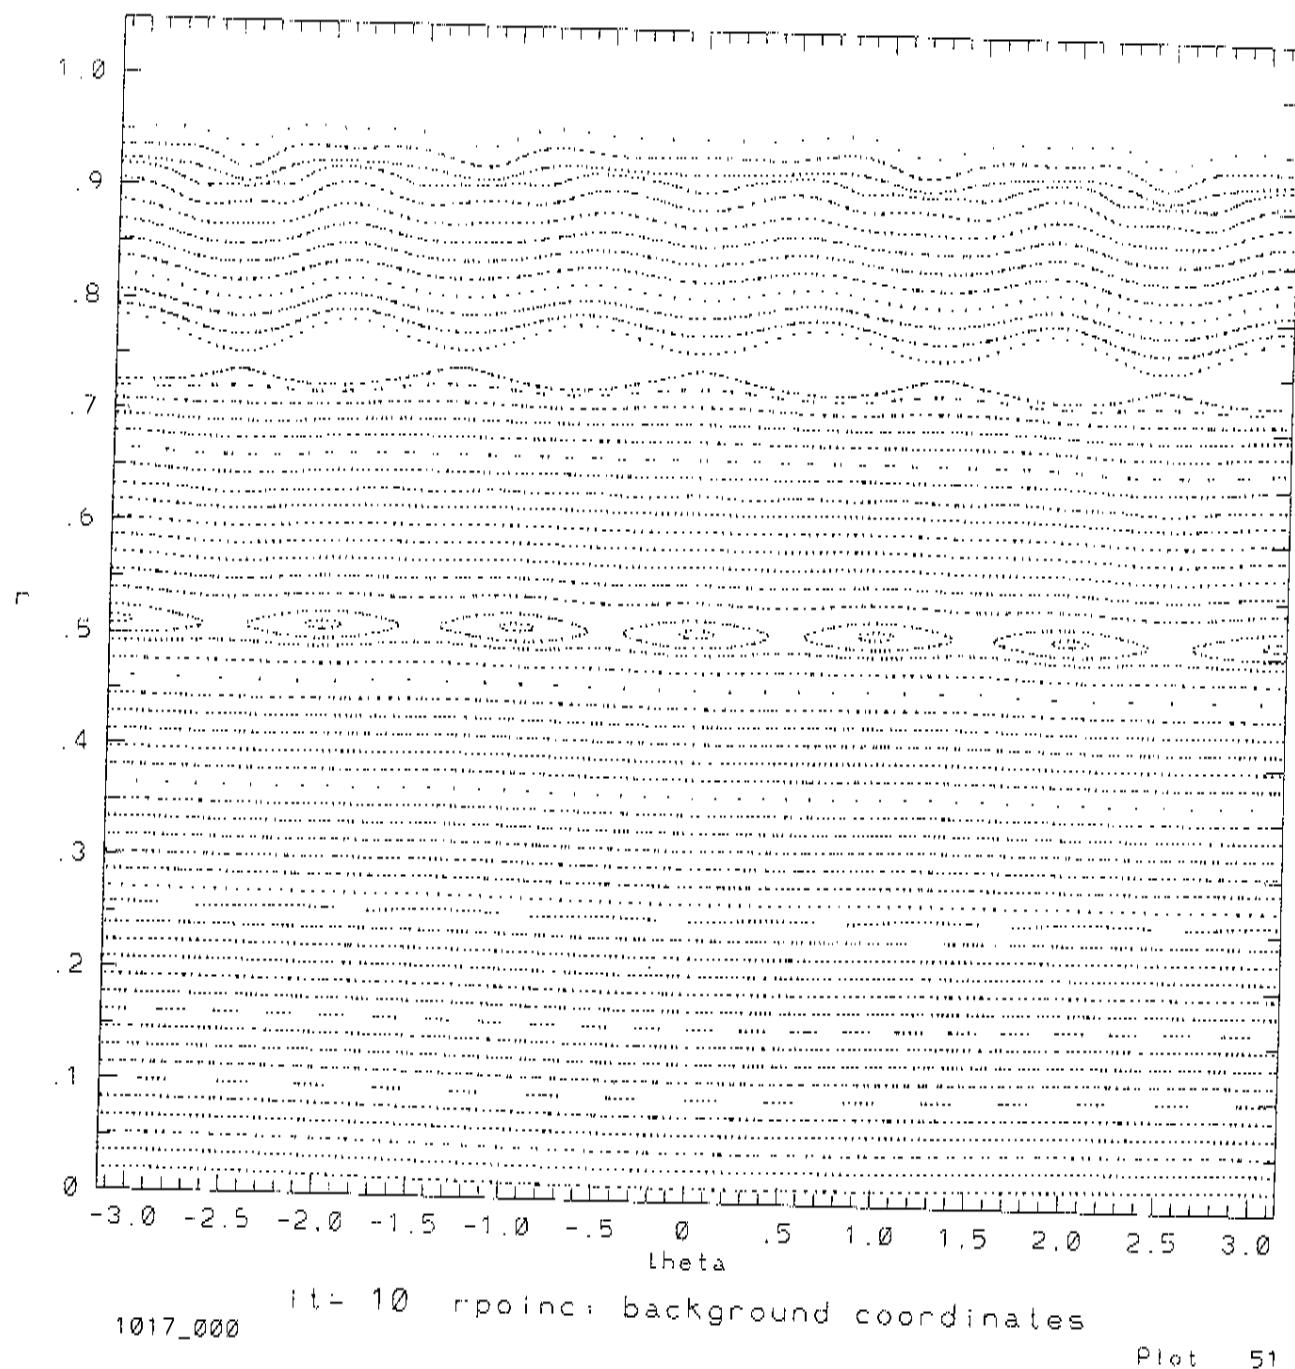

E

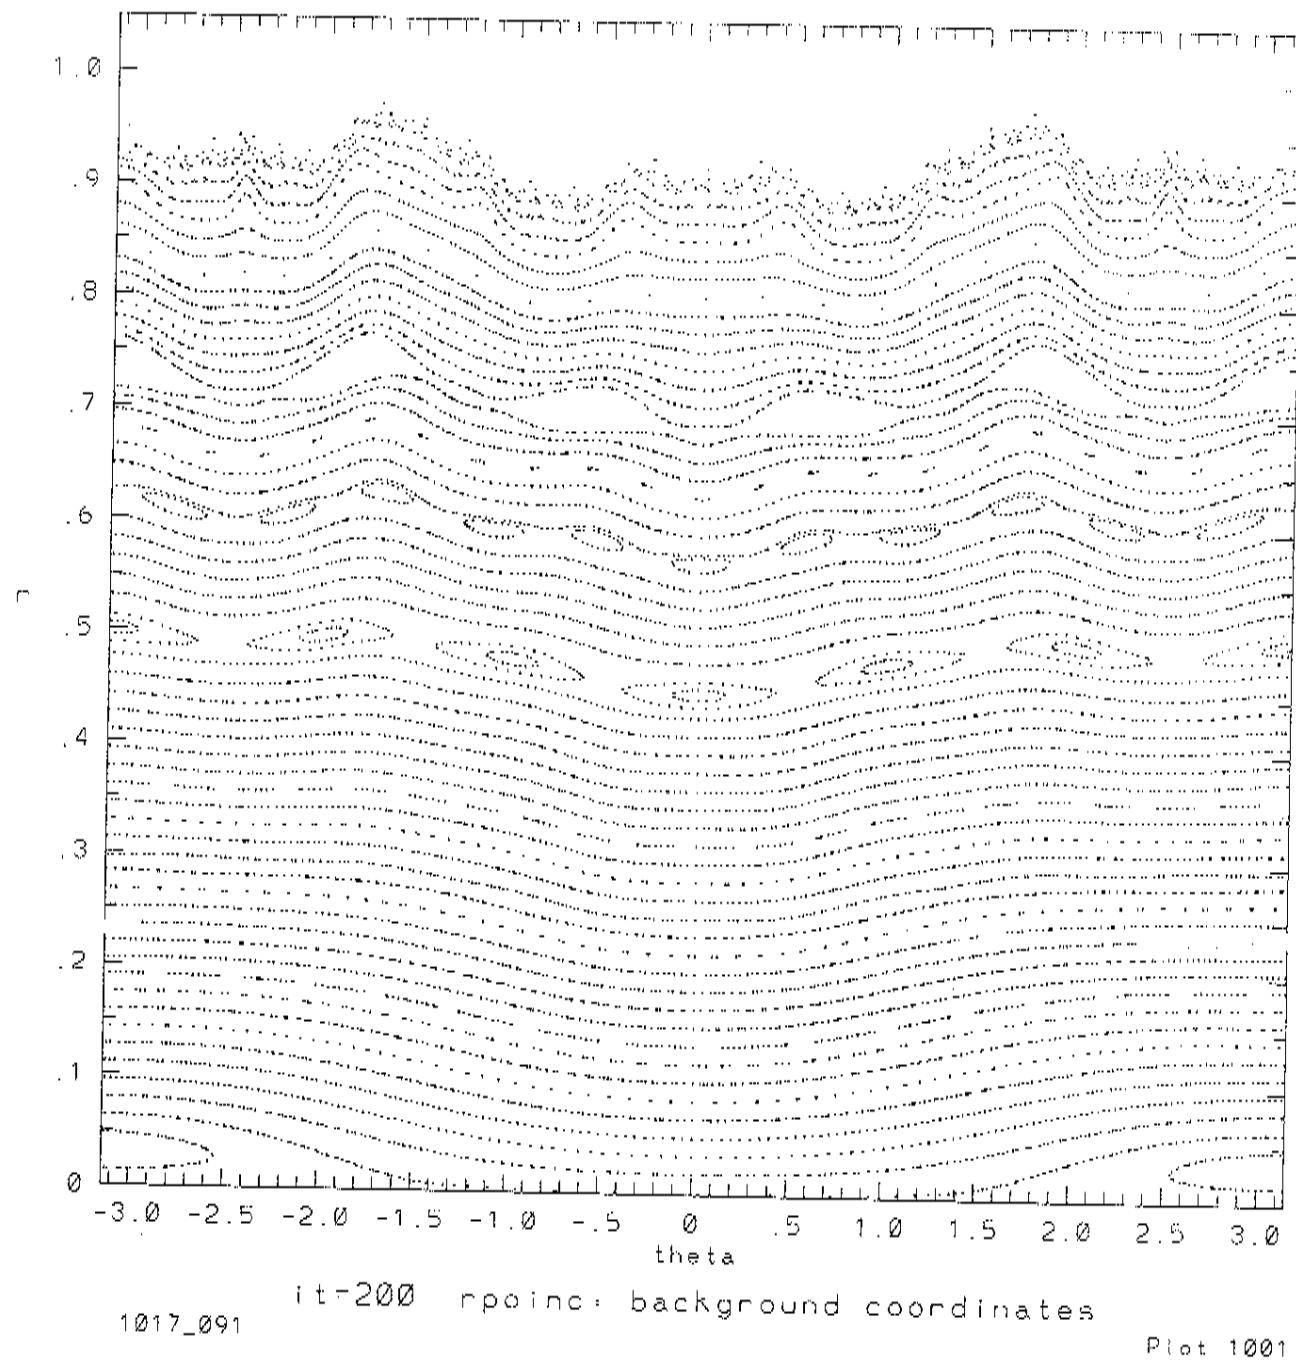

it = 10 npoints: background coordinates  
1017\_091

Plot 51

- PIES Poincare plot after 10 PIES iterations using the original 10/17 coils.

- PIES Poincare plot after 200 PIES iterations using the healed 10/17 coils.

Plot 1001

- PIES Poincare plot after 180 PIES iterations using the original 10/17 coils.
