

### Contingency Specification Rationale Worksheet

|   |                  |  |             |              |
|---|------------------|--|-------------|--------------|
| <b>WBS Level 4 Identifier: 143</b>  |                  | <b>Title: Modular Coil Local I&amp;C</b> |             |              |
| <b>Originator: Dave Williamson</b>  |                  | <b>Date: 9/18/03</b>                     |             |              |
|   |                  |  |             |              |
|   | <b>Technical</b> | <b>Schedule</b>                          | <b>Cost</b> | <b>Total</b> |
| <b>Risk Factor (Table 2-1):</b>   | 6                | 4  | 8           |              |
| <b>Weighting Factor (Table 2-2):</b>  | 2                | 1  | 1           |              |
|   |                  |  |             |              |
| Percent   | 12               | 4  | 8           | 24           |
| <b>Recommended Contingency Allowance (%): 24%</b>   |                  |  |             |              |
| <br><b>Rationale for Selection of Contingency Allowance:</b>  |                  |  |             |              |
| <p>The close tolerances in which to install the local I&amp;C warrants a moderate level of contingency.</p> |                  |  |             |              |
