Test Profiles

Select profile from this table for details of **Strain Gage Series** and **Adhesives** selection:

- [General Static Stress](#)

Static measurements of moderate to high accuracy over a wide temperature range.

- [Static-Dynamic Stress Analysis](#)

Low cycle measurements of moderate to high accuracy over a wide temperature range.

- [High Elongation \(Post Yield\)](#)

One cycle measurements of up to 20% strain with moderate accuracy over a wide temperature range.

- [Dynamic \(Cyclic\) Stress Analysis](#)

High cycle measurements of moderate accuracy.

- [Transducer Gaging](#)

Moderate to very high accuracy measurements of non-strain engineering parameters.
