	Responsible Line Manager		Date	
	Project Manager		Date	
	Engineering Department Head		Date	

Description:

This element covers the design of the electrical leads within the cryostat, serving all the coils: the TF (WBS 131), PF (WBS 132), External Trim (WBS 133), and Modular (WBS 14) Coils.

Notes:

LN2 distribution system instrumentation consists of a single thermocouple placed on each return header inside cryostat
There will be a single supply and return header for each field period which supplies the TF coils and the upper and lower PF coils

3. Reviews and procurement specs for T/C are covered as part of WBS 171

Μ

Materials and Supplies		
Description: This effort covers procurement of materials for the LN2 distribution system by fixed price subcontract.		Basis of Estimate
Assumptions: outside engr rate = outside fab rate = outside inspection/technician rate =	120 \$ per hour 60 \$ per hour 80 \$ per hour	Based on recent experiences on NCSX and UT work being done at MDL Based on recent experiences on NCSX and UT work being done at MDL Based on recent experiences on NCSX and UT work being done at MDL
Purchased parts: coolant line pigtails from coils to manifolds Insulating Jumper hoses Manifolds for cooling lines valves other hardware Thermocouples	\$18,480 see notes below \$4,320 \$6,612 \$6,000 see notes below \$23,200 \$0 included in job 1431 for the modular coil fabrication subtotal, purchased parts \$58,612	See Worksheet Below See Worksheet Below See Worksheet Below See Worksheet Below
Worksheet: coolant line pigtails from coils to manifolds Average length of pigtail	3 ft Total TF Modular PE1 PE2 PE3 PE4 PE5 PE4	
No. of coils circuits per coil at header total circuits Total number of pigtalis Cost per pigtali, with fittings Total cost of pigtalis Number of MC coil insultating break jumper hoses and end fittings cost per jumper total cost of jumpers	Itel Itel	Based on recent purchases for NCSX and UT at MDL Based on recent purchases for NCSX and UT at MDL
Manifolds for cooling lines Assume 1 pair of 1.5 inch manifolds for each field period, one above and one below the midplane inside the PF5 coil Each manifold will have 1/3 of the required cooling connections plus 25% spare The manifolds will connect via vertical pipes to the supply system below the cryostat		
avg toroidal perimeter of field period avg vertical height of connection lines no of header pairs cost of tubing cost per field period total number of coolant connections, all headers cost per connection cost of nipples for all manifolds welding consumables no. connections for supply piping cost per connection cost for supply piping connections total malt cost for manifolds	16 ft 9 ft 3 \$15 per foot, 316 SSt \$2,232 840 \$5 \$4,200 \$200 total 6 2 connections per manifold \$30 \$180 \$6,612	Based on recent purchases for NCSX and UT at MDL
Flow control hardware

NCSX June 2007 ETC TABLE IV - Uncertainty of Estimate and Residual Risk Assessment

WBS Number: 161 WBS Title: LN2 Distribution System Job Number: 1601-161 Job Title: LN2 Distribution System Job Manager: Paul Goranson

Uncertainty of the Esti	mate				
				Uncertainty	
	High	Medium	Low	<u>Range (%)</u>	Comments/Other Considerations
Design Maturity	х				Design well established based on previous devices
				-5%/+10%	
Design Complexity			х		Standard Components
044					
Other Comments:					

Note: High/Medium/Low uncertainty assessment from Job Manager. Uncertainty range based on AACEI recommended practice 18R-97 as amended for NCSX.

Residual Impa	<u>cts</u>				Cost	Impact	Schedule	Impact	
Job	Risk Description	Likelihood of Occurring	Mitigation Plan	Basis of estimate	Low	High	Low	High	
NONE									
Notes: [1] Low cost	t and schedule impacts are conside	ered the minimum (0-perce	ntile) impacts should the ev	ent occur.					

	High cost and schedule impacts are considered the maximum (100-percentile) impacts should the event occur
[2]	Cost impacts should be entered as man-hours (by demographic) and M&S direct cost under basis of estimate.
	Cost impacts should NOT include standing army costs which are separately calculated from the schedule impact
	Project control is reponsible for quantifying the low and high cost impacts based on the labor hours and M&S identified

[3] The schedule impacts should be entered as the min and max impacts on the critical path. If there is no critical path impact then the schedule entries should be zero.

[4] Likelihood of occurrence should be entered consistent with our risk classification methodology, i.e. VL= Very Likely (P>80%), L=Likely (80%>P>40%), U=Unlikley (40%>P>10%), VU=Very Unlikely (P<10%), NC=Non-credible (P<1%)</p>
