## NCSX Work Approval Form (WAF)

WBS Number: 162
WBS Title: Coil Electrical Leads
Job Number: 1601-162
Job Title: Coil Electrical Leads
Job Manager: Paul Goranson
Description:
This WBS element consists of the design and fabrication of the coil electrical leads inside the cryostat which then connect the coils to the power supply bus or cables outside the cryostat.

Schedule:
See Attached

WBS Number: 162
WBS Title: Coil Electrical Leads
Job Number: 1601-162
Job Title: Coil Electrical Leads
Job Manager: Paul Goranson

## Description

This effort covers all Titte 1,1 II, and III engineering for the LN2 distribution system inside the
yostat, which includes all he necessary manifolding and connections to interface with the ex-
ryostat LN2 supply system. This system will be fabricated in-house by PPPL. All Title III eng
associated with installation is included in WBS 7 .

Pro-E models
assy dugs
Detail drawings
cooing schematic
C schematic
ress analysis
thermal analysis
special analysis
ocurement speciications
neetings/reporting/presentations

drawings for lead length, mounting
one installation dwg for each cable
one cooling schematic for all leads
one coooing schematic for all le
one schematic for each circuit
part tof WBS 163
part of WBS 163
one analysis to check temp rise, cooling
one analysis for field error determination
one analysis for fied error determination
one specification for reads, all cary the same current, will have til
one review for all coil leads

## Fabrication and Assembly

No local fab or assembly is anticipated for the Coil leads. Installation is part of WBS 7.

NCSX June 2007 ETC
TABLE IV - Uncertainty of Estimate and Residual Risk Assessment
WBS Number: 162
WBS Title: Coil Electrical Leads
|Job Number: 1601-162
Job Title: Coil Electrical Leads
Job Manager: Paul Goranson

Uncertainty of the Estimate

Note: High/Medium/Low uncertainty assessment from Job Manager. Uncertainty range based on AACEI recommended practice 18R-97 as amended for NCSX.

| Residual Impacts |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  | pact | Schedu |
| Job | Risk Description | Likelihood of Occurring | Mitigation Plan | Basis of estimate | Low | High | Low |

NONE

## Notes:

1] Low cost and schedule impacts are considered the minimum (0-percentile) impacts should the event occur
High cost and schedule impacts are considered the maximum (100-percentile) impacts should the event occur
[2] Cost impacts should be entered as man-hours (by demographic) and M\&S direct cost under basis of estimate.
Cost impacts should NOT include standing army costs which are separately calculated from the schedule impact
Project control is reponsible for quantifying the low and high cost impacts based on the labor hours and M\&S identified
[3] The schedule impacts should be entered as the min and max impacts on the critical path.
If there is no critical path impact then the schedule entries should be zero.
[4] Likelihood of occurrence should be entered consistent with our risk classification methodology, i.e.
VL= Very Likely ( $\mathrm{P}>80 \%$ ), L=Likely ( $80 \%>P>40 \%$ ), U=Unlikley ( $40 \%>P>10 \%$ ), VU=Very Unlikely ( $\mathrm{P}<10 \%$ ), NC=Non-credible ( $\mathrm{P}<1 \%$ )
