

Contingency Specification Rationale Worksheet

WBS Level 4 Identifier: 63		Title: Utility Systems		
Originator: L. Dudek		Date: September 17, 2003		
	Technical	Schedule	Cost	Total
Risk Factor (Table 2-1):	4	4	4	
Weighting Factor (Table 2-2):	3	1	1	
Percent	12	4	4	20
<p>Recommended Contingency Allowance (%): Recommend using 20 % contingency.</p> <p>Rationale for Selection of Contingency Allowance:</p> <p>A 4% increase in contingency is recommended since there are no firm design requirements for the utility systems. This additional contingency should cover changes that will become evident during the design process.</p>
