14. The profile of the nb port checks -0.150 / +0.218.

Project Disposition:

After review by Mike Cole and Art Brooks, the project has determined that the shell geometry poses no hard interferences and the plasma encroachment is acceptable. The bosses had been reviewed and previously accepted. However, due to some discussion about the method of calculation of the boss true positions reported by Major Tool above, a second review was made along with further discussion with Major Tool. This review is summarized in the two attachments included with this NCR. "RE NCR20384 boss numbers.msg" and "Final data for review of VVSA3 NC 20384.msg" Therefore, project disposition is: use as is.
