1						I												
	d II Design																	
Cor	mplete PF Coil SRD							24										
																		Update analysis to reflect new coil structure, Examine stresses with fully anealed co
																		for lower manufacturing costs. Evaluate thermal stresses with new support structure
	date PF Analysis							160										Engineering judgment based on past analysis. 120hrs Analyst, 40hrs Eng
Upc	date PF Coil SDD							24										Past experience Revise model to reflect changes and coplete lead area, based on experiance with p
Cor	mplete PF4 PDR Model								80									iterations of PF coil design
	Inplete I I 4 I Dit Model																	Revise model to reflect changes and coplete lead area, based on experiance with p
Cor	mplete PF5 PDR Model							1	80									iterations of PF coil design
																		Revise model to reflect changes and coplete lead area, based on experiance with p
	mplete PF6 PDR Model								80									iterations of PF coil design
	pare for PDR - presentation materials D								36							ļ		12 hours per coil set
Pre	pare for PDR - presentation materials E	ng						52										Prepare presentation, Define interfaces and responses to design requirements
	R pare Review and Approve Conductor Sp							16 16								+		Covers personel on job who attend review Past Experience - 1.5 days to write spec and 4hrs for revisions and approvals
	pare Review and Approve Conductor Spare Review and Approve Coil Spec							48			+							Past Experience - 4 days to write spec and 4 days for revisions and approvals
	ail Drawings PF4								80									16hrs per drawing 5 drawings
Dis	position PDR Chits							24										Past experience
	ail Drawings PF5								80									16hrs per drawing 5 drawings
	ail Drawings PF6								80									16hrs per drawing 5 drawings
	alysis Support							70										25% of analysis time to evaluate analysis and iterate design
PDI  Dro	R Level Design Support						<mark> </mark>	60	60									25% of design time for development of PDR Coil Models, Engineering Judgement 25% coverage for detailed drawing development
	Stress analysis with leads							120	00									Evaluate lead area including
	pare for FDR - presentation materials D	esigner	· · · · · · · · · · · · · · · · · · ·	I		-		.20	36					-				12 hours per coil
Pre	pare for FDR - presentation materials Er							52										Prepare presentation, Define interfaces and responses to design requirements
PF	FDR							16										Covers personel on job who attend review
																		Resolve Design issues resluting from FDR, Based on past experience and enginee
