

**ECN-5066.** This ECN Revised winding pack and conductor dimensions to match as-built Twisted Racetrack Coil (TRC) measurements. The first involved a very slight increase in the large radius (by sanding) in zone G-6 to provide additional winding pack clearance. In Zone D-4, a groove was added to the end of the block for the purpose of routing the flux loop diagnostic.

**(See ECN-5066 for details)**
